

GRAIN MILLERS *Recommended* MILLING OAT VARIETIES

WESTERN CANADA

OUR PARTNERSHIP IS A *Promise*

The map provided is designed as a tool to help identify where different oat genetics perform best. The zones outlines are not meant to serve as a rule but a guide to selecting varieties. Please contact grain millers if any questions or concerns arise.

Western Canada

GRAIN MILLERS

MILLING OAT VARIETIES

RECOMMENDED

ZONE 1 | CDC Arborg
 CS Camden¹
 CDC Minstrel
 CDC Ruffian
 CDC Seabiscuit

ZONE 2 | CDC Arborg
 CS Camden¹
 CDC Minstrel
 CDC Ruffian
 AAC Summit

ZONE 3 | CDC Arborg
 CS Camden¹
 CDC Minstrel
 CDC Ruffian
 AAC Summit

If a variety is listed as recommended in any zone it is considered acceptable across all zones. Varieties are listed in alphabetical order.

ACCEPTABLE

CDC Dancer
 AAC Justice
 AAC Leggett
 AAC Morgan
 Souris
 Triactor¹

UNDER REVIEW

CDC Endure
 AAC Oravena
 ORe3541M
 ORe3542M

PROHIBITED

Bourdrias
 Bullion
 Cascade
 Grizzly

Gwen
 Jasper
 Jordan
 Juniper

Lu
 Murphy
 Mustang
 Ronald

Whitestone
 Feed Varieties
 Hullless Varieties
 Forage Varieties

¹ Due to reduced rust resistance this variety may require a fungicide application, under conventional systems, in rust-prone areas.

Grain Millers recommends the frequent scouting of oats fields for both insects and plant diseases from early in the growing season through heading. If leaf fungal diseases are seen, the timely application of registered and approved fungicides for non-organically grown oats is approved and recommended to enhance both yield and grain quality potential. Contact Grain Millers for more information.

At the time of publication, it is believed that the varieties listed above, combined with good agronomic characteristics and management, should provide the best opportunity for growers to produce food quality oats. Before purchasing or planting oat varieties not listed, please contact Grain Millers to discuss attributes of other varieties considered.
