GRAIN MILLERS MILLING OAT VARIETIES

WESTERN CANADA

OUR PARTNERSHIP IS A
Promise

The map provided is designed as a tool to help identify where different oat genetics perform best. The zones outlines are not meant to serve as a rule but a guide to selecting varieties. Please contact grain millers if any questions or concerns arise.

Western Canada

GRAIN MILLERS MILLING OAT VARIETIES

RECOMMENDED

ZONE 1 | CDC Arborg¹
CS Camden¹
CDC Ruffian
CDC Seabiscuit

ZONE 2 | CDC Arborg¹
CS Camden¹
CDC Ruffian
AAC Summit

ZONE 3 | CDC Arborg¹
CS Camden¹
CDC Ruffian
AAC Summit

If a variety is listed as recommended in any zone it is considered acceptable across all zones.
Listed in alphabetical order.

ACCEPTABLE

AAC Leggett
CDC Minstrel
AAC Morgan
ORe3542M
Souris
Triactor¹

UNDER REVIEW

CDC Endure
AAC Oravena

AAC Kongsore
CDC Skye

PROHIBITED

Bourdrias
Bullion
Grizzly
Cascade

Gwen
Jasper
Jordan
Juniper

Lu
Murphy
Mustang
Ronald

Whitestone
Feed Varieties
Hulless Varieties
Forage Varieties

¹ Due to reduced rust resistance this variety may require a fungicide application, under conventional systems, in rust-prone areas.

Grain Millers recommends the frequent scouting of oats fields for both insects and plant diseases from early in the growing season through heading. If leaf fungal diseases are seen, the timely application of registered and approved fungicides for non-organically grown oats is approved and recommended to enhance both yield and grain quality potential. Contact Grain Millers for more information.

At the time of publication, it is believed that the varieties listed above, combined with good agronomic characteristics and management, should provide the best opportunity for growers to produce food quality oats. Before purchasing or planting oat varieties not listed, please contact Grain Millers to discuss attributes of other varieties considered.
