## RECOMMENDED VARIETIES FOR MILLING OATS U.S. Midwest

Variety	Breeding Origin	Maturity	Crown Rust	Stem Rust	BYDV	Hull Color
Reins	U of Illinois	Early	MS	MS	MS	Tan
Sumo	SDSU	Early	MR	MR	MS	White
Rushmore	SDSU	Medium	MR	MR	MR	White
Saddle	SDSU	Medium	MR	MR	MS	White
SD Buffalo	SDSU	Medium	MR	MR	MR	White
Leggett	AAFC	Late	MS	MS	S	White
ND Carson	NDSU	Late	MR	MR	MS	White
Rockford	NDSU	Late	S	MR	R	White
Beach	NDSU	Late	MS	MR	MS	White
MN Pearl	U of MN	Late	MS	MR	MS	White

R - Resistant  
MR - Moderately Resistant  
MS - Moderately Susceptible  
S - Susceptible

*At the time of publication, it is believed that the varieties listed above, combined with good agronomic characteristics and management, should provide the best opportunity for growers to produce food quality oats. Before purchasing or planting oat varieties not listed, please contact Grain Millers to discuss attributes of other varieties considered.*

*Grain Millers recommends the frequent scouting of oats fields for both insects and plant diseases from early in the growing season through heading. If leaf fungal diseases are seen, the timely application of registered and approved fungicides for non-organically grown oats is approved and recommended to enhance both yield and grain quality potential. Contact Grain Millers for more information.*

Please contact Crop Improvement Associations or Grain Millers for descriptions or more information on varieties.
